Summary

Data Scientist Analyst with 1+ year of experience in building business-facing dashboards, KPI frameworks, and analytical reports. Strong expertise in Python, Excel, Power BI (Power Query, DAX), SQL-based data modeling, and stakeholder-driven reporting. Experienced in transforming cloud-hosted transactional data into scalable BI solutions with a strong focus on data quality, performance, and business impact.

Technical Skills

Programming: Python (pandas, NumPy, matplotlib), SQL

Visualization Tools: Power BI (Power Query, DAX), Tableau, Advanced Excel (Pivot Tables, XLOOKUP)

Databases & Tools: MySQL, SQL Server, GitHub, AWS

ETL & Data Handling: Automated ETL Pipelines, Data Extraction, Cleaning, Transformation, Validation, Reconciliation

Experience

Glowbrite Systems Pvt Ltd

July 2024 – January 2026

Data Scientist Analyst

Bangalore, Karnataka

- Owned end-to-end e-commerce analytics for conversion, cost, and customer experience issues by translating stakeholder problem statements into KPI-driven insights and decision-ready dashboards.
- Built an incremental ETL pipeline using Python (Boto3, Pandas) and PostgreSQL, ingesting data from Amazon S3 and creating a reliable analytics warehouse with raw, staging, and mart layers.
- Designed analytics-ready data models and implemented data quality checks (schema validation, duplicate detection, reconciliation) to ensure a single source of truth for BI reporting.
- Developed Power BI dashboards using DAX measures to analyze payment conversion funnels, operational costs, return drivers, and delivery performance, enabling leadership to identify revenue leakage and margin pressure.
- Partnered closely with cross-functional stakeholders to validate assumptions, prioritize fixes, and track improvements over time across payments, logistics, suppliers, and customer support.

Projects

Credit Card Customer & Transaction Analytics | *Power BI, SQL, Excel*

- Built a centralized MIS dashboard tracking total spend, transaction volume, average order value, and customer segmentation KPIs.
- Performed data reconciliation and validation between customer master and transaction datasets to eliminate reporting discrepancies.
- Conducted trend analysis and customer segmentation to support performance tracking and targeted business insights.

Weekly Business Review (WBR) - HR MIS Dashboard | *Power BI, SQL, Excel, DAX*

- Cleaned, standardized, and validated employee data using Power Query to create a reliable reporting dataset.
- Designed and owned an end-to-end WBR-style MIS dashboard tracking workforce KPIs including Headcount, Attrition, Average Salary, and Trends.
- Implemented interactive drill-downs and filters to support leadership monitoring and decision-making.
- Ensured reporting accuracy through systematic data quality checks.

Music Store Database Analytics | *SQL*

- Analyzed a relational music store database to uncover insights on customer behavior, sales performance, popular genres, and top-performing artists.
- Performed optimized SQL queries using joins, aggregations, subqueries, window functions, and CTEs to answer real business questions.
- Identified top customers, revenue-driving cities and countries, best-selling artists, and genre preferences by region.

Education

Thadomal Shahani Engineering College, Mumbai

May 2020 – June 2024

Bachelor of Engineering in Computer Engineering

CGPA: 8.86/10.0

* Relevant Coursework: Data Structures and Algorithms, Machine Learning, Big Data, OOP, Operating Systems, Computer Networks, DBMS

Certifications

- Microsoft Power BI Data Analyst Professional Certificate
- SQL (HackerRank)
- Python (Udemy)
